

Java Programming Assignment 1

README

This assignment contains three Java programs demonstrating basic Java programming concepts: Variables and Data Types, Array Operations, and If-Else/Nested If-Else Statements.

Question 1: Variables and Data Types

The first program demonstrates the use of different Java data types and basic operations.

- int
- double
- char
- boolean
- String
- Addition, subtraction, and multiplication
- String concatenation

File:

```
Question1_VariablesDataTypes.java
```

Question 2: Array Operations

The second program creates an integer array and calculates the sum, average, largest element, and smallest element.

Sample Array:

```
10, 20, 30, 40, 50
```

Expected Output:

Array elements	10, 20, 30, 40, 50
Sum	150
Average	30
Largest element	50
Smallest element	10

```
File: Question2_ArrayOperations.java
```

Question 3: Voting Eligibility

The third program demonstrates If-Else and Nested If-Else statements. It checks age and valid identification.

- Age below 18 → Not eligible to vote
- Age 18 or older with valid identification → Eligible to vote
- Age 18 or older without valid identification → Missing/invalid ID

File: Question3_VotingEligibility.java

Project Structure

```
Assignment 1/  
■■■ Question1_VariablesDataTypes.java  
■■■ Question2_ArrayOperations.java

■■■ Screenshots/  
    ■■■ Question1.png  
    ■■■ Question2.png  
    ■■■ Question3.png
```

How to Run

- 1 Open the project in IntelliJ IDEA or another Java IDE.
- 2 Open the required .java file.
- 3 Run the Java program.
- 4 Check the output in the Run/Console window.

Screenshots

Take full-screen screenshots for each question showing the complete code, program output, and IDE. Do not use online compiler screenshots or crop/edit the screenshots.

Submission

Compress the complete Assignment 1 folder into Assignment 1.zip. The ZIP should contain all Java programs, screenshots, and the README file.
